

Critical Path

US-6 is dependent on US-25 because Club Page needs to know the current user in order to evaluate if they are the owner of that Club or not. If they are, they will be able to add new executives to the club so that the team can post under the club as well.

US-27 is dependent on US-25 which is log in b/c in order for US-27 to be completed we need to know the user that is logged to thus make our application act accordingly like if the user goes to the club listing page, our application needs to know the user that is logged in to be able to tell which clubs have already been followed.

Anything related to the Current User in the web application was hardcoded, but US-27 was created to make all changes necessary that were dependent on sessions from previous sprints.
